ARTICLES OF INCORPORATION

OF THE

Sonora Arizona Gold Mining & Milling Company.

KNOW ALL MEN BY THESE PRESENTS: That Harvey Finch, Jos. Saavedra, L. C. Finch, who this day associated themselves together and do hereby associate ourselves together for the purpose of forming a corporation under the laws of the Territory of Arizona, and do make, shen acknowledge and publish these articles in writing and do hereby certify:

ARTICLE I.  
The name of this corporation shall be the SONORA ARIZONA GOLD MINING & MILLING COMPANY.

ARTICLE II.  
The principal place for the transaction of the business of this corporation shall be at Nogales in the County of Santa Cruz, and Territory of Arizona, and there shall be branch offices established for the transaction of the business in the State of Sonora, Mexico, and Detroit, Michigan, and there may be branch offices established at such other places as the Board of Directors may from time to time direct. Said corporation may also carry on and transact business of the kind and nature hereinafter provided, in any and all of the states and territories of the United States and the Republic of Mexico.

ARTICLE III.  
The business proposed to be carried on by said corporation and the purposes for which the same is formed are as follows:

(a) In general, to engage in and carry on the business of mining, refining, smelting and manufacturing of any and all kinds of ores, minerals and metals.

(b) To purchase, lease or acquire by license, bond, option, patent, concession, grant or otherwise any lands, mines, mineral rights, buildings, easements, rights or privileges, machinery, plant or other property, or effects whatsoever, and to use the same in the carrying on of the business of the corporation.

(c) To prospect and search for ores and minerals; to develop mines and grant licenses for mining in and over any lands which may be acquired by this corporation, and to sell and otherwise dispose of the lands, mines or other property franchises or privileges of this company.

(d) To buy, sell, manufacture and deal in mineral plants, machinery, implements, conveniences, provisions and things capable of being used in connection with mining operations or required by workers or others employed by the company.

(e) To construct, carry out, improve, manage, work, control, and superintend any roads, ways, railways, bridges, reservoirs, water courses, aqueducts, wharves, furnaces, mills, crushing works, hydraulic works, electric works, factories, ware-houses or other works and conveniences which may seem directly or indirectly conducive to any of the objects of the company and to contribute to, subsidize or otherwise aid or fortify in any such operations.

(f) To subscribe for, buy, sell or otherwise dispose of the capital stock or shares of the capital stock of this or any other corporation, and generally to do any and all acts and things and transact any and all other business incidental to the purposes or any of the purposes aforesaid, and not contrary to the laws of the Territory of Arizona, or of the United States, or the State of Sonora or the Republic of Mexico.

ARTICLE IV.

The amount of the capital stock of the corporation shall be One Million Dollars, divided into One Million shares, each share of One Dollar each; payment for the said stock to be made in such manner and at such times as the Board of Directors shall determine and authorize, but all of the said stock to be issued as fully paid and non-assessable stock.

ARTICLE V.

The time of the commencement of this corporation shall be the first day of January, 1908.

## The Border Vidette.

AUGUST 24, 1907.

### LOCAL ITEMS

Don't forget Nogales is going to celebrate the Sixteenth of September in fine style. Already \$3,000 has been raised to help.

Mr. and Mrs. George E. Tuttle, formerly of Nogales, are now residing in Phoenix, having recently arrived there from Trinidad, Colorado.

Go to Neumann's gallery for Edison Phonographs and Records, Postal Albums, Kodaks and Supplies, Mailing Envelopes, Etc. Nogales Arizona.

BRICK FOR SALE.—Moore & Jones, of Nogales, Arizona, have just finished burning a kiln of 175,000 first class brick. If you contemplate building, now is your chance to buy brick—cheap.

According to the Tucson papers Ted Healy, formerly of Nogales, now of Cananea, Sonora, will shortly establish a newspaper in the big copper camp, having gone to Los Angeles to purchase a plant.

George Januel, the expert German barber, opposite the Sonora News Company, guarantees his work, and respectfully invites you to give him a trial. Everything neat and clean. Hair-cutting a specialty.

Yesterday Marshal Moore and his enthusiastic assistants were very much in evidence rounding up dogs. Before the harvest is over the marshal expects to capture several hundred. There will still be plenty more left.

Wednesday Mr. Lee Reagan, president of the Alamos Copper Company, went to Tucson on private business, being accompanied as far as Patagonia by his brother James, who is successfully engaged in business at that thriving little burg.

Mrs. George B. Marsh is visiting relatives in Illinois, where later on in the season she will be joined by Mr. Marsh who has not been home for three years. Certainly George has earned a rest and his host of friends throughout Santa Cruz county hope he'll have a fine time.

Charley Dean, one of Southern Pacific Agent Bowman's splendid working force, has taken a leave of absence and gone back to his old Alabama home to enjoy a visit with relatives and friends. Charley's many friends wish him a pleasant trip and a speedy return to Nogales.

Mr. Ike King, owner of large mineral holdings within a short distance of Nogales, on the west side of the Patagonia mountains, has just bonded one of his groups of copper claims. The property has great merit and there is no doubt will develop into all Mr. King and the gentleman who has secured a bond expect them to be.

Right-of-Way-Agent Fred. A. Krohn of the Cananea, Yaqui River & Pacific railway, came up from the south Thursday evening and spent the night here with Mrs. Krohn and the children, going on to Tucson yesterday. Major Krohn's position with the company is a very important one, but he has no trouble "making good."

Tuesday evening Mrs. J. A. Harrison and interesting little children returned from their summer's outing on the Pacific coast, being met here by Supervisor Harrison, who on Wednesday morning accompanied them to their pleasant ranch home north of the city. While here Mr. Harrison attended the weekly meeting of the Board of Trade.

Mr. E. M. Bind, the Los Angeles consulting mining engineer, is in the city. Mr. Bind has become interested with Messrs. H. K. and Dr. Chesoweth in their Santa Cruz copper properties, which are said to be looking very good and have the appearance of becoming paying mines, under Mr. Bind's supervision. A big lot of work will be done at once.

Pedro Aguirre, purchasing agent for the Black Mountain Mining Company, was been a business visitor in the city this week. He reports operations at the big gold camp progressing nicely, the plant being increased from 1,000 to 1200 tons daily capacity.

Professor O. R. Page, principal of the Nogales public schools, who is spending his summer vacation in the Santa Rita mountains, this county, has returned to the hills after several days visit in town. Professor Page is greatly enjoying his sojourn among the picturesque pine covered hills near Patagonia, which at present is his postoffice address. He will return to civilization next week. School will open on Monday, September 2nd.

Mark Wanless, the Hermosillo mining man, accompanied by Mrs. Wanless and the children came up from the capital city Thursday evening and spent yesterday in Nogales, departing for the south this morning. Mark is manager of the Agua Prieta mines in the Magdalena district, where a big lot of work is being done before starting up the reduction plant built for his company by the Arizona-Sonora Manufacturing Company of Nogales. The property is an old and mighty good one. Earl Griswold of Nogales, is secretary of the company, which is organized under the laws of Arizona.

Mr. G. Casillas, a prosperous business man of Santa Rosalia, Mexico, who arrived in Nogales several days ago, has purchased from Mr. L. B. Fleischer, the splendid saloon and billiard hall at the corner of Elias avenue and International street, Nogales, Sonora. Ignacio Salgado, one of the best known, most popular mixers of wet goods in Nogales, will manage the resort for Mr. Casillas, who after closing the deal returned to Santa Rosalia.

George D. Gross, the mine superintendent, has been in town a couple of days this week visiting his family and transacting business for his company. He reports development work on his company's splendid properties progressing nicely, work on the big double compartment working shaft proving well worth the price. Shortly George expects to commence hauling good ore to this point for shipment to the smelter. He has worked faithfully and well for his company and deserves the success he is having.

Robert Carew, the veteran railroad man, who for many years has been running between Nogales and Benson, is taking a lay off which he is enjoying at his mines in the Santa Rita mountains adjoining the Alta properties. Bob and his associates have a splendid property from which they will shortly ship good pay ore which will place them high and dry on "Easy Street." We wish Bob and his associates abundant success and hope they'll develop their mine into a great bonanza.

H. J. Small of Sacramento, California, chief of the motive department of the entire Pacific system of the Southern Pacific railway, which extends from El Paso to Oregon and includes the Randolph lines and the Southern Pacific roads in Mexico, returned to the United States Wednesday evening in his private car, after having visited Guaymas and points on the Cananea, Yaqui River & Pacific line. He was accompanied by his nephew, Mr. J. W. Small, superintendent of the motive power of the Randolph lines. From Nogales Mr. Small went to El Paso.

J. H. Wakefield, who for more than thirteen years has held down a group of fine mining claims in the Huachuca mountains, Cochise county, was a visitor in Nogales Thursday, having driven down from his camp to purchase a load of camp and mine supplies from Roy & Titcomb, Inc., and other local dealers. Wakefield is one of the pioneer prospectors of southern Arizona, and his numerous friends will be glad to learn that he expects soon to make a turn where-by he will land high and dry on "Easy Street." He says his section of the country is looking better than at any time since he has been there. There has been a great abundance of rain this season, and for several seasons past and there is plenty of feed and water, as a result.

W. D. Fredricks, manager of the "La Cobreza Mining Company," was a business visitor in Nogales Tuesday and Wednesday, having arrived the evening before from his company's copper properties west of Noria, the station recently established on the Sonora railroad for the Sonora Copper Company. Manager Fredricks, who is an experienced mining man, reports operations at the mines progressing nicely. At present Llano, Sonora, is the company's postoffice, but just as soon as a postoffice is established at Noria, which is many miles nearer his camp, that place will be used as the company's shipping point. Mr. Fred. O. Emery is president of the company; he is an experienced, conscientious miner and has unbounded faith in the future of his copper property.

Manager L. G. Oster of the Western Union Telegraph Company at this place is entitled to the thanks of patrons of the telegraph company. Since the telegraphers have been out all over the country, local senders of telegrams have been notified at the time of presenting messages at the local office that the chances of same reaching destination were mighty slim, and they filed same at their own risk. In cases where the local office was unable to deliver the goods, Manager Oster has hot-footed around and notified the senders, thus giving them a chance to use the United States mail and express, much slower, but just at present, surer methods of reaching the out side world. Mr. Oster is a first-class telegrapher of many years experience and a very accommodating gentleman besides.

L. M. Raines, manager of the Columbia Consolidated Mining Company, has for some time past had a number of old prospectors out in the hills west of Nogales looking for copper prospects, and they have succeeded in discovering a bunch of mighty good looking claims—twenty-six pertencias—which he has denounced and had surveyed by Engineer Pedro Trellas, of Magdalena, Sonora, who was here the first of the week. Mr. Raines has named his new discovery "Duranguense," and will at once do considerable development work in order to determine the extent and value of the ore bodies at depth. Samples from the surface give good values in copper and silver, and Mr. Raines, who is an experienced miner, believes he will open up a big copper-silver mine at small expense, within a short distance of Nogales.

City Councilman Bert Cumming is on the sick list.

Sneak thieves are very much in evidence in Nogales.

"Uncle" John Smith is a visitor in the city from Patagonia.

Harry Smith, cashier of Banco de Sonora, of Hermosillo, accompanied by Mrs. Smith, has returned from a pleasure trip on the Pacific coast.

This morning Mr. F. F. Cranz, the geologist and mine expert, was a north-bound passenger, en route to Douglas on private business. Mrs. Cranz accompanied him.

Emery Chalfant, the well known Wells Fargo Express messenger, will about the first of September open the Chalfant Cold Storage, in the George B. Marsh block.

Dr. and Mrs. A. L. Gustotter and baby boy, left this morning for Long Beach, Cal., for a month's pleasure trip. During the doctor's absence Dr. A. H. Noon will look after his professional business.

The Water Franchise Election last Tuesday passed off in a very quiet manner, there being little opposition to the granting of the twenty-five year water franchise. There were 85 votes for and 14 votes against the proposition.

Alberto Mascareñas, manager of the local Banco de Sonora, accompanied by his family and sister Mrs. L. B. Fleischer, and Master Roberto Fleischer, left the first of the week for Los Angeles, where Mr. Mascareñas hopes to regain his health.

James Brent and Charley Bond are in the city, the former from Roy de Oro, Mexico, the latter from an extended visit in the east with his partner Bob Martin, who will return later. Mr. Bond says he had a fine time, but is mighty glad to get home.

The funeral of Sam McClintock, the young man who died the day before at the Sisters Hospital, in this city, took place last Monday. The cause of the untimely passing of this worthy young man was typhoid fever contracted on the Yaqui river where he was in the employ of the Cananea, Yaqui River & Pacific railway. Sam was a good boy and will be missed.

Bernardino Fimbres, who last Monday night at Washington Camp, shot and killed Juan Flores, is in the county jail, having been brought in from that camp by Sheriff Harry Saxon. Ignacio Ruiz, another Mexican said to have taken part in the shooting, made his escape into Mexico. Fimbres was held to appear before the grand jury without bail. A woman is said to have been the cause of the killing.

Thursday morning Colonel Epes Randolph, general manager for all the Southern Pacific lines in Arizona and Sonora, Mexico, accompanied by Julius Kruttschnitt, vice president and director of maintenance and operation of the Harriman lines, with offices in Chicago, Superintendent Oster of the Sonora branches, Assistant Locating Engineer Reagan and other officials went south by special train composed of the private cars "Ostege," "Guadalupe" and "Francisco," and a baggage car. This is Mr. Kruttschnitt's annual trip of inspection, which will include the Cananea, Yaqui River & Pacific railway, now building rapidly toward Mazatlan and Guadalupe. Colonel Randolph has just returned from Los Angeles where he met Mr. Kruttschnitt and accompanied him over the Randolph lines in Arizona. At this time of the year, owing to the splendid rains, the country to the south of Nogales, along the line of the railroad is beautiful to look upon and the officials will no doubt enjoy their trip of inspection. The party returned north this morning.

### New Zambona Stock.

Amos J. Yaeger, superintendent of the Zambona Development Company, owning the Zambona silver-copper mines at Minas Nuevas, near Alamos, Sonora, arrived in the city Thursday night from Los Angeles. Recently the Zambona company increased the capital stock of the company from \$500,000 to \$650,000, par value of stock being \$1.00. On August 15th the Board of Directors of the company passed a resolution placing the 150,000 shares of new stock on the market at \$1.25, the proceeds to pay for making a number of needed improvements which should increase the profits of the company \$230,000 per year, from the working of eighty tons of ore per day, the present production. It is the intention to in the near future install a central electrical power station and a large cyanide plant which are greatly needed. The present stockholders are given until September 3rd to purchase this new issue of stock, after which date the privilege will cease.

The Zambona ore chute has been opened up to a depth of 700 feet at which level fifty feet of drifting has been done on ore of a higher value than the average of ores above this level. On the 600 level the chute has already been developed 150 feet in length and a cross cut shows a width of twenty-two feet. On the 500 foot level the ore body is 245 feet in length and twenty-five feet in width.

With the proposed new improvements, the Zambona will in a very short time be paying permanent dividends on the small capitalization of \$650,000, and the stockholders will doubtless jump at the chance of taking their portion of the new issue between now and September 3rd, 1907, at the low price of \$1.25.

Within a very short time stockholders who have not seen their property, will be able to take a pleasant all-rail trip to the very mouth of the Zambona shaft. Those that have been there say many of them will see a mine (with a big M).

### CONARD MAKING GOOD RECORD.

Sonora Copper Co. Property Continues to Increase in Value.

The writer spent last Sunday at Buena Vista, the lively mining camp owned by the Sonora Copper Company in Sonora three miles east of Noria, a newly established station on the Sonora branch of the Southern Pacific between Llano and Puerto, for the accommodation of the big copper company, La Cobreza Mining Company, and other growing mining camps in the vicinity.

The trip to Buena Vista is made over a fine, smooth wagon road. Here the showing made on the company's immense property under the intelligent, economical personal management of President A. M. Conard of Nogales, is truly wonderful and proves beyond a possible doubt the wisdom of the board of directors in giving him a free hand.

Since December 8th, last, Mr. Conard has possibly done more work at Buena Vista than any other mining company in the state of Sonora, with the number of men employed and the amount of money expended.

He has built pleasant quarters for the miners—about fifty, many of whom have large families—a large substantial building has been erected which is used as a company store, office, etc., and accommodation of officers and stockholders when at camp, which lies at the base of the mammoth copper-silver vein that can be plainly seen from the railroad three miles west. Besides the Big Vein, there are three other well defined veins upon the property of extraordinary size being traceable for several miles, the Big Vein more than two hundred feet high.

Already nearly thirteen hundred feet of profitable shaft and tunnel work has been done which greatly enhances the value of Sonora Copper Company's property and proves beyond a peradventure of a doubt that it is a truly wonderful mining proposition, and that every dollar subscribed is being intelligently and honestly expended.

The property is being developed by tunnels, and shafts; a 1000 foot cross-cut tunnel, now in more than 300 feet, will cut the Big Vein at the end about 750 feet below the out-crop.

A main working shaft is being sunk to a depth of 500 feet. It is now down 250 feet and at the 200-foot level a cross-cut is being run toward the Big Vein and will cut three smaller copper-silver veins.

Machines drills and air compressors will shortly be installed by Mr. Conard when the work of taking out ore will be pushed with greater vigor than in the past, although no time is lost, eight-hour shifts being employed in all the workings.

On Sunday the telephone line from Noria to Buena Vista was completed; about the same time that connection was made with the out-side world, Mine Foreman Michael announced the striking of a new body of high-grade copper on the Cobre Grande mine east of the Big Vein, selected samples of the ore being now on exhibition at this office. Since then, the ore body has increased in size and richness.

Tunnel No. 2 on the Washington mine has been driven 250 feet, all in ore better than \$70.00 to the ton. When seen by the writer the pay streak was over five feet wide. This copper-silver-lead mine alone looked worth the money.

Tunnel No. 3 on the Washington, lower down on the same vein, is showing even better values as depth is attained.

Certainly the Sonora Copper Company has the making of a wonderful property and with the present splendid management, cannot help becoming one of the biggest, most valuable producers in the state of Sonora. Of this all who have seen the property are convinced.

President and General Manager Conard has just cause to feel proud of the excellent showing he has made in a very short time, and cheerfully invites stockholders of Sonora Copper and their friends to visit the property at Buena Vista, when they will see a mining proposition "worth the money."

Don Franklin and Harry Smith, the mining men, returned the first of the week from the property of the Mercedes Copper Company, at Santa Cruz, about twenty-five miles from Nogales, where Colonel W. O. Greene recently denounced nearly 10,000 acres of copper bearing land, on which extensive exploration is at present being done. Mr. Franklin stated that Dr. E. M. Carpenter of Cananea, and others are mining some high-grade ore there and the district is looking very promising. The Mercedes Copper Company, which, by-the-way, was the first to enter the new copper district several years ago, has large holdings of splendid property which is now being explored and developed; a main shaft is being sunk two hundred feet in depth, from which extensive prospecting for ore will be done in a systematic, thorough manner under the direction of experienced miners, and it is confidently expected that large bodies of high grade copper-silver ore will be encountered, and the Mercedes Copper Company, of which O. K. Franklin and Harry Smith of this place are large stockholders, become a large producer of red metal.
